

Gasket Materials

MLS (Multi Layer Steel)

The Cometic MLS gasket is comprised of three layers of Stainless Steel. Cometic uses Stainless steel for increased strength, it's ability to rebound and corrosion resistance. The outer layers of the gasket are embossed and coated on both sides with a flouroelastomer rubber based material (Viton) designed to meet the demands of a variety of harsh sealing environments, load conditions and surface finishes. The Viton coating is heat resistant to 250°C or 482°F.

The center or shim layer of the gasket is comprised of an uncoated Stainless Steel layer, which can be varied to accommodate multiple thickness requirements. The MLS gasket is ideal for both aluminum heads to cast iron blocks and aluminum heads to aluminum blocks.

The composition of MLS will also withstand the shearing forces created by aluminum heads on cast iron blocks. No re-torque is necessary. By design the MLS gasket promotes an even torque load across the sealing surface allowing for measurable reduced bore distortion.

Available thickness: .027", .030", .036", .040", .045", .051", .060", .065", .071", .074", .120"

AFM (Aluminum Foam Material)

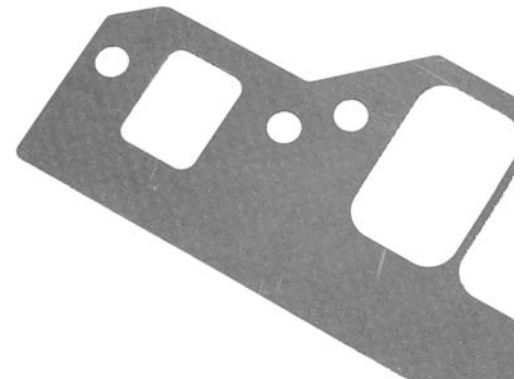

Is the ideal gasket material for machined surfaces, especially when used between two uneven stamped surfaces that have been plated. AFM is a chemically blown, compounded nitrile synthetic rubber bonded to an aluminum core with temperature resistance of over 250°F. AFM material has an 85% recovery while maintaining strong torque retention. AFM does not require gasket sealers or silicone bead. Re-torque is not required.

Available thickness: .018", .032", .045", .060"

CFM-20

A perforated steel core with an elastomer surface is ideal for head gaskets allowing heat to be drawn evenly across the gasket surface while providing maximum sealing characteristics when exposed to coolants and oils.

Available thickness: .043", .059"

Spring Steel:

A stainless steel core with a .001" thick coating of viton rubber on both sides.
Available thickness: .010", .014", .020"

Gasket Materials

Aramid Fiber

Is a premium hi-temperature, hi-density creep resistant material that requires no re-torquing and is fuel resistant. All Cometic fiber materials are asbestos free and require no additional sealants.

Available thickness: .012", .015", .020", .031", .039", .047", .060", .094", .125", .188"

Copper (Dead Soft)

Available thickness: .005", .010", .016", .020", .027", .032", .043", .050", .063", .080", .094"

Armor Clad

Ideal for exhaust gasket applications. Can withstand temperatures up to 2000°F. Compressable to seal less than perfect sealing surfaces. Retains torque.

Available thickness: .042", .064"

CUSTOM ORDER WORKSHEET

Please have this basic information ready and any other modifications that have been done to your specific application to ensure quick and accurate delivery.

- "Actual" bore size of block: _____
- Desired thickness you will need to achieve proper deck clearance. _____
(Refer to Gasket Materials for available thickness or visit www.cometic.com for online catalog).
- What type of block are you using CAST IRON or ALUMINUM?
- What type environment will the gasket be subject to?
- What is your planned compression ratio? _____:_____
- Is your application naturally aspirated or forced induction?
- If force inducted how much boost do you plan on running? _____
- Do you have heads that require valve pockets in the gasket or round bore? If pocketed you must provide dimensions.
- Is the chamber O.D. in the head larger than the bore? _____
- If so, dimensions must be supplied: _____
- Who is the manufacturer of the head: _____
- What is the part # and or model: _____
- Who is the manufacturer of the block: _____
- What is part # and or model: _____

Phuzion^{\'fyü-zhən\}

(440) 354-0777
(800) 752-9850

Cometic Gasket's *Phuzion* is the next stage in head gasket development. *Phuzion* is comprised of a Cometic MLS head gasket and multiple Garlock Helicoflex gas filled o-rings.

By combining the two technologies a superior combustion seal is created without machining any grooves in your block and/or head.

The gas filled o-ring portion of *Phuzion* is manufactured from high strength aerospace tubing capable of withstanding ultra high combustion temperatures and pressures. Additionally each ring is plated with silver to increase the sealing level and minimize brinelling. The silver also aids in withstanding head to block movements without burnishing the surfaces. The real innovation to the gas filled o-ring though, is the gas itself. During the manufacturing process the gas in the ring is sealed in at 500-600 psi at room temperature. As the engine is warmed up, the gas is heated increasing the pressure inside the ring causing it to expand. This allows the ring to seal the combustion even in the event of head liftoff.

Garlock Helicoflex[®]
PERFORMANCE METAL SEALS

The MLS gasket portion of *Phuzion* is what gives you the ability to use the gas filled o-rings without machining any grooves in your block and/or head. MLS head gaskets are comprised of three layers. Viton coated embossed spring steel outer layers and a steel inner layer, which provides support and thickness to the gasket. Embossments on the MLS gasket allow for proper seal around oil and water passages.

Phuzion Requirements:

Head and Deck surfaces should be within .002" of flatness and have a surface finish of 50RA or finer. The compressed operating thickness of *Phuzion* is .051".

Phuzion is currently available for:

WARRANTY DISCLAIMER*

Due to the nature of performance applications, the parts in this catalog are sold without any express warranty or any implied warranty of merchantability or fitness for a particular purpose. Cometic Gasket Inc. shall not, under any circumstances, be liable for any special, incidental or consequential damages, including, person, party or property, but not limited to, damage, or loss of property or equipment, loss of profits or revenue, cost of purchased or replacement goods, or claims of customers of the purchase, which may arise and/or result from sale, installation or use of these parts. Installation of these parts could adversely affect the motor manufacturers warranty coverage.

VENUE-The agreed upon venue, in the event of any dispute whatsoever between the parties, whether instituted by either party, including, but not limited to, contract terms, payment terms, delivery, type, defects, sufficiency of product, shall be the Court of Common Pleas, Lake County, Ohio or the Painesville Municipal Court, Lake County, Ohio, depending on the amount in controversy.

This agreement shall be governed by and construed under the laws of the State of Ohio.

All prices and terms are subject to change without notice.

Terms Open accounts may be established by well rated firms. A credit application is available upon request. Open accounts are due payable Net 30 days from date of invoice. No statement will be sent. If an account becomes 60 or more days past due, it is subject to being placed on credit hold. No orders will be shipped or new orders accepted until past due balance is paid. If an account becomes 90 or more days past due, it is subject to being placed for collections. All costs of collection are the responsibility of the customer, including attorney fees, court costs, and other expenses of litigation.

Returns- Authorization (RGA) must be obtained in advance on all returns. A packing slip or invoice number must accompany the merchandise. No returns after 30 days from invoice date. All returns are subject to a 25% restocking charge. All custom designed and custom manufactured gaskets are non-returnable. Only catalog parts are returnable.

Review your invoice and notify us immediately of any incorrect or inaccurate information. Shortages must be reported within 10 days.

WEGO Wide-Band AFR (Air/Fuel Ratio) Metering System

Features

- Complete air/fuel ratio metering system with built-in data logging. Includes WEGO Wide-Band Exhaust Gas Oxygen Sensor Interface, Bosch LSU4.2 5-wire wide-band oxygen sensor, 18x1.5mm weld nut for mounting sensor on exhaust pipe, PC link cable, and software on CDROM.
- Versatile tuning aid for all carbureted and fuel injected engines, displays AFR (air/fuel ratio) and logs up to 3 hours data including AFR, engine RPM, and a spare 0-5V analog input for sensors such as throttle position or manifold pressure.
- Can be used for on-road or dyno testing.
- Suitable for automotive, motorcycle, and other small engine applications.
- Highly accurate with less than ± 0.15 AFR error over 10.3-19.5 AFR range.
- Easy free-air calibration procedure corrects for sensor aging effects.
- 0-5V analog output compatible with most data logging systems. Simple linear scaling with $AFR = 10 + 2 \times \text{Volt}$.
- Red LCD display with backlight provides great readability in all conditions ranging from bright sunlight to total darkness.
- Wide supply voltage range from 11-18V allows operation from battery on small engines and race vehicles without an alternator. Current drain is approx. 1 amp.
- Compact size: 3.7"L x 1.7"W x 0.75"H.
- WEGO data logging software runs under Windows 98/ME/XP. The PC link cable attaches to a serial (COM) port or USB adapter. The software allows viewing AFR, engine RPM, and analog sensor data with user defined scaling. Data can also be exported to Excel for further analysis.

<i>Part #</i>	<i>Description</i>	<i>List Price</i>
WEGO-SYS	<i>Extended Harness (96")</i>	<i>\$462.85</i>
WEGO-SYS-SH	<i>Short Harness (48")</i>	<i>\$462.85</i>
WEGO-SYS-AS	<i>For Use With Methanol</i>	<i>\$548.95</i>

WEGO II Wide-Band AFR Metering System With Gauge

Features

- Complete air/fuel ratio metering system with built-in data logging. Drives any Auto Meter® AFR monitor gauge (not included). Allows you to choose the gauge style that best matches your dash or use an existing gauge for true wide-band display.
- Versatile tuning aid for all carbureted and fuel injected engines displays AFR (air/fuel ratio) and logs up to 3 hours data including AFR, engine RPM, and a spare 0-5V analog input for sensors such as throttle position or manifold pressure.
- Converts Auto Meter® gauge to true wide-band display from 10.0 to 19.5 AFR in 0.5 AFR steps per LED. Green LEDs in RICH segment show 10.0 to 12.5 AFR, Yellow LEDs in STOICH segments show 13.0 to 17.5 AFR, Red LEDs in LEAN segment show 18.0 to 19.5 AFR.
- Includes WEGO II Wide-Band Exhaust Gas Sensor Interface, Bosch LSU 4.2 5-wire wide-band oxygen sensor, 18x1.5mm weld nut for mounting sensor on exhaust pipe, and software on CDROM.
- Highly accurate with less than ± 0.15 AFR error over 10.3-19.5 AFR range.
- Easy free-air calibration procedure corrects for sensor aging effects.
- 0-1V analog AFR output compatible with most Auto Meter® and most other conventional narrow-band gauges.
- Red LCD display with backlight provides great readability in all conditions ranging from bright sunlight to total darkness.
- Compact size: 3.7"L x 1.7"W x 0.75"H.
- WEGO data logging software runs under Windows 98/ME/XP. The WEGO II PC link cable attaches to a serial (COM) port or USB adapter. The software allows viewing AFR, engine RPM, and analog sensor data with user defined scaling. Data can also be exported to Excel for further analysis.
